What is your dream?

- What do you want for your child now and in the future?
- **What do they want for themselves?**
- How do YOU define your role in helping your child reach ***their*** goals?
- Who can help you to help your child reach their goals?

Person-Centered Planning

- uses a variety of tools and strategies
- encourages people to listen with all senses

... disability is a natural part of the human experience and in no way diminishes the right of individuals to —

- (A)** live independently;
- (B)** enjoy self-determination;
- (C)** make choices;
- (D)** contribute to society;
- (E)** pursue meaningful careers; and
- (F)** enjoy full inclusion and integration in the economic, political, social, cultural, and educational mainstream of American society

Self-Advocacy *and* Self-Determination

Self-advocacy, in its simplest form is when a person advocates on their own behalf.

Self-determination describes a person's right to the same opportunities and a person's control over aspects of his life that are important to him – two different concepts that are both of equal value.
